INDEX TO VOLUME 37

Erratum: Owing to error, pages 237–244 both inclusive were omitted from the pagination of Volume 37. The volume is nevertheless complete; no pages of text are actually missing.

Absorption, The, of bacteriophage by sensitized enterococci 333
Accessory, An, factor required for the synthesis of polysaccharide by *Leuconostoc*. Abstract 230
Acetobacter suboxydans, The preparation of perseulose by oxidation of perseitol with 629
Action, The, of sulfanilamide on meningococci in vivo and in vitro. Abstract 225
Aerobacter indologenes, Effect of aldehydes and fatty acids as added hydrogen acceptors on the fermentation of glucose by 619
Aerobiosis, The relation of, to the fermentation of mannitol by staphylococci 245
Agar, A comparative study of the use of varying concentrations of, in the test medium used to detect contaminants in biologic products 121
Agar-agar, The introduction of, into bacteriology 485
Agglutinin absorption relations between *Shigella dysenteriae* and *Escherichia coli*, The specificity of the agglutinin reaction for *Shigella dysenteriae*. II 27
—— reaction, The specificity of the, for *Shigella dysenteriae*. II. Agglutinin absorption relationships between *Shigella dysenteriae* and *Escherichia coli* 27
——, The, response to *Brucellergen*. Abstract 656
Albino rat, The implantation of oral and intestinal strains of *L. acidophilus* in the 51
Aldehydes and fatty acids, Effect of, as added hydrogen acceptors on the fermentation of glucose by *Aerobacter indologenes* 619
Antibacterial, The, effects of the organic mercurial compounds. Abstract 581
Antigenic properties, The cultural and, of *Shigella sonnei* 315
Antiseptic value of certain phenolic ointments. Abstract 658
Ascorbic acid, The oxidation of, as influenced by intestinal bacteria 501
Assimilation and respiration, On the relation between, in suspensions and in cultures of *Escherichia coli* 523

Bacilli, Cultural requirements for the production of black pigments by 277
Bacteria, Growth factors for. VII. Nutrient requirements of certain butyl-alcohol-producing bacteria 259
——, intestinal, The oxidation of ascorbic acid as influenced by 501
——, Precipitins for the tuberculin proteins of acid-fast 461
——, Precursors to the formation of creatinine by 111
——, The lethal action of short ultraviolet rays on several common pathogenic 447

Bacterial, A new, species isolated from the chuckawalla (*Sauromalus varius*) 647
—— cultures, The determination of histamine in 187
—— cultures, The production of histamine in 205
—— growth, Factors limiting. IV. The age of the parent culture and the rate of growth of transplants of *Escherichia coli* 285
Bacteriological, A, and serological study of 245 infants and young children with acute gastroenteritis. Abstract 232
—— diagnosis of gonorrhea in the male. Abstract 656
Bacteriology, The introduction of agar-agar into 485
Bacteriophage, The absorption of, by sensitized enterococci 333
Bacteriostatic, The, effect of sulfanilamide, disulon, and neoprontosil in vitro on acid-fast bacilli. Abstract 226
Baker, J. A. The etiology of tuberculosis of fish. Abstract. (No abstract) 225
Banfield, Laura, Plastridge, W. N., and Williams, L. F. Some factors affecting the agglutinability of streptococci associated with bovine mastitis. Abstract 352
Bartram, M. T. and Black, L. A. Productivity of media containing milk for recently isolated strains of the coliform group 371
Basidiomycete, A, culture from sputum. Abstract. (No abstract) 472
Beckwith, T. D. and Fish, C. H. Precursors to the formation of creatinine by bacteria 111
—— and Morgan, H. R. Immunological relationships of polysaccharides of mucoid organisms of the typhoid-salmonella group 389
Behrer, Otto P. and Moody, Wm. M. A comparative study of bacteriological examinations of restaurant utensils. Abstract 231
Berry, George Packer, Williams, Clara H., and Sandholzer, Leslie A. The inhibition of bacteriophage by phospholipids. Abstract 223
Beta-hemolytic streptococci, Double-zone. Their cultural characteristics, serological grouping, occurrence and pathogenic significance 133
Black, L. A. and Bartram, M. T. Productivity of media containing milk for recently isolated strains of the coliform group 371
—— and Pelczar, Michael J., Jr. The implantation of oral and intestinal strains of *L. acidophilus* in the albino rat 51
Black pigments, Cultural requirements for the production of, by bacilli 277
Bloor, Walter R., Williams, Clara H., and Sandholzer, Leslie A. A study of the lipids of certain enteric bacilli 301
Boak, R. A. and Carpenter, C. M. Resistance of the gonococcus in vitro to gradually increased concentrations of sulfanilamide. Abstract 226
Boerner, Fred, Jones, Charles A., and Lukens, Marguerite. A simplified method for the preparation of an antigen for use in complement fixation test for syphilis. Abstract 109
—— and Lukens, Marguerite. A simplified complement fixation technic for the serological diagnosis of syphilis. Abstract 108
Borden, David, and Kulp, Walter L. A study of rat pneumonia. Abstract 351

Bozalis, George S. and Markham, Floyd S. Chick embryo inoculation as a diagnostic aid in variola and varicella. Abstract ... 656
Breed, Robert S. The seventh edition of standard methods for the examination of dairy products. Abstract ... 223
Brewer, C. M. Routine testing of disinfectants and the scientific attitude. Abstract ... 581
Brewer, John H. An improved method for testing antiseptic dusting powders ... 411
——. The antibacterial effects of the organic mercurial compounds. Abstract ... 581
Bronfenbrenner, J. J. Motion picture film on rabies. Abstract ... 656
——, Hershey, A. D. and Doubly, J. Evaluation of germicides by a manometric method ... 583
Brown, J. Howard. Double-zone beta-hemolytic streptococci. Their cultural characteristics, occurrence and pathogenic significance ... 133
Brucella melitensis, var. *melitensis*, *abortus*, and *suis*, Effects of sulfanilamide on ... 269
——, Nicotinic acid and thiamin hydrochloride as growth-promoting factors for ... 495
Bruner, D. W. and Edwards, P. R. A note on the monophasic non-specific *Salmonella* types ... 365
Bucca, Helen Bieniasz, Falk, Carolyn R., and Simmons, Margaret P. A comparative study of the use of varying concentrations of agar in the test medium used to detect contaminants in biologic products ... 121
Burnett, Jack Mehl. The effect of bacteriophage on staphylococcus K in a 5 per cent salt medium. Abstract ... 659
—— and Moore, Helen N. The effect of 5 per cent sodium chloride on various organisms; the effect of bacteriophage on Kreugers staphylococcus at this salt concentration. Abstract. (No abstract) ... 658
Butter, A skunk-like odor of bacterial origin in ... 251
Butyl-alcohol-producing bacteria, Nutrient requirements of certain. Growth factors for bacteria. VII ... 259

Carbon dioxide tension, A method for producing increased, in individual culture tubes and flasks ... 153
Carlson, Warner and Stahly, G. L. An accessory factor required for the synthesis of polysaccharide by *Leuconostoc*. Abstract ... 230
Carpenter, C. M. and Boak, R. A. Resistance of the gonococcus in vitro to gradually increased concentrations of sulfanilamide. Abstract ... 226
—— and Gibbons, L. L. The bacteriostatic effect of sulfanilamide, disulon, and neoprontosil in vitro on acid-fast bacilli. Abstract ... 226
Carpenter, Philip L. Nitrogen metabolism of certain coliform bacteria ... 11
Central New York State Branch, S. A. B. Proceedings ... 223
Central Pennsylvania Branch, S. A. B. Proceedings ... 233
Certain electrophoretic relationships of colon bacilli ... 21
Chalian, William. The pathogenesis of local tetanus. Abstract ... 107
Chandler, Caroline A., Fothergill, Leroy D. and Dingle, John H. The pattern of dissociation in *Hemophilus influenzae* ... 415

Chapman, George H. and Lieb, Clarence W. Certain electrophoretic relationships of colon bacilli 21
Chemical factors influencing the growth of tubercle bacilli. I. Metal catalysts 377
Chick embryo inoculation as a diagnostic aid in variola and varicella. Abstract 656
Chloramine, Comparative resistance of recently isolated and older laboratory strains of *E. typhosa* to the action of 1
Chorio-allantoic membrane, The, of the developing chick as a medium for the cultivation and histopathologic study of pathogenic fungi. Abstract. (No abstract) 659
Chromogenic strains of *Escherichia* 91
Chuckawalla (*Sauromalus varius*), A new bacterial species isolated from the .. 647
Clark, Francis E., and Smith, Nathan R. Cultural requirements for the production of black pigments by bacilli 277
Clark, W. C. Antiseptic value of certain phenolic ointments. Abstract .. 658
Claydon, T. J. and Hammer, B. W. A skunk-like odor of bacterial origin in butter 251
Clifton, C. E. and Logan, W. A. On the relation between assimilation and respiration in suspensions and in cultures of *Escherichia coli* 523
Clostridium parabotulinum, The extracellular proteolytic system of 541
——, *A.*, The nutritional requirements of 429
Cocci, Meningitis caused by atypical gram-negative 401
Coliform bacteria, Nitrogen metabolism of certain 11
—— group, Productivity of media containing milk for recently isolated strains of the 371
Collodion, A, sac for use in animal experimentation. Abstract 229
Colwell, Eugenia Valentine. The relation of aerobiosis to the fermentation of mannitol by staphylococci 245
Comparative, A, study of bacteriological examinations of restaurant utensils. Abstract 231
——, A, study of the use of varying concentrations of agar in the test medium used to detect contaminants in biologic products 121
—— resistance of recently isolated and older laboratory strains of *E. typhosa* to the action of chloramine 1
—— study of the intracutaneous injection of P. P. D. and the Vollmer patch test for the detection of tuberculosis. Abstract 233
Cone, J. F. *Pseudomonas aeruginosa* in bovine mastitis. Abstract 353
Connecticut Valley Branch, S. A. B. Proceedings 351
Contaminants in biologic products, A comparative study of the use of varying concentrations of agar in the test medium used to detect 121
Contamination of drinking glasses by streptococci. Abstract 224
Conti, L. F. and Crowley, J. H. A new bacterial species isolated from the chuckawalla (*Sauromalus varius*) 647
Cooper, Merlin L. and Grabill, Frank J. A simplified apparatus for the preservation of bacterial cultures in the dried state. Abstract 230
——, with the assistance of H. M. Keller, J. B. Milliken, B. Johnson, H. F. Marsh, F. J. Grabill and G. W. Thomas. A bacteriological and serolog-

ical study of 245 infants and young children with acute gastro-enteritis. Abstract ... 232
Costello, J. P. and Lind, H. E. Epidemic of nursery diarrhea. Abstract ... 655
Creatinine, Precursors to the formation of, by bacteria ... 111
Crowley, J. H. and Conti, L. F. A new bacterial species isolated from the chuckawalla (*Sauromalus varius*) ... 647
Cultural, A, and serological study of *Phytomonas tabaca* and certain related forms. Abstract ... 234
—— requirements for the production of black pigments by bacilli ... 277
——, The, and antigenic properties of *Shigella sonnei* ... 315
Culture tubes and flasks, A method for producing increased carbon dioxide tension in individual ... 153

Deere, Charles J. On the "activation" of the lactase of *Escherichia coli mutabile* ... 473
——, Dulaney, Anna Dean, and Michelson, I. D. The lactase activity of *Escherichia coli-mutabile* ... 355
Determination, The, of histamine in bacterial cultures ... 187
Deutsch, Joyce V., Eggerth, Arnold H., and Littwin, Ralph J. The determination of histamine in bacterial cultures ... 187
Dick, Leo A. Contamination of drinking glasses by streptococci. Abstract ... 224
